Name of Tariff:

Internet Access Services (the “Services”)

Description of Tariff:

The Services offer a wide range of dial-up and fixed broadband services to access the Internet. Customers can choose from a wide range of services with various bandwidths to meet their needs. The Legacy Services listed below are provided to existing subscribers of those services, but are no longer sold to new customers. The new Services are currently available for subscription.

Current Services:

Service	Monthly Fee
1.5M to 100M Basic Plan	\$700
2500M + 1000M / 2x1000M/4x1000M Multi-Use Broadband Service Plan	\$3,500
8M to 50,000M Fiber-to-the-home Plan	\$8,888
Additional NETVIGATOR Email Account	\$88/email account

The reference to M and G in the service description refers to the bandwidth specifications of the subscribed Services for the broadband line connected from the first piece of network equipment or central office of the NETVIGATOR network to the modem at the customer premises. For Basic Plans, bandwidth specifications of 1.5M, 3M, 6M, 8M, 18M, 30M and 100M listed on the Application correspond to a dedicated downstream bandwidth of 1.5Mbps/ 3Mbps/ 6Mbps/ 8Mbps/ 18Mbps/ 30Mbps/ 100Mbps and dedicated upstream bandwidth of 640Kbps/ 640Kbps/ 640Kbps/ 800Kbps/ 1Mbps/ 10Mbps/ 30Mbps respectively. For Fiber-to-the-home Plans, bandwidth specifications of 8M, 30M, 50M, 100M, 200M, 300M, 500M, 1000M, 2500M and 5000M correspond to a maximum upstream and downstream bandwidth of 8Mbps/ 30Mbps/ 50Mbps/ 100Mbps/ 200Mbps/ 300Mbps/ 500Mbps/ 1000Mbps/ 2500Mbps/ 5000Mbps respectively. For 2x1000M Multi-Use Broadband Service Plans, bandwidth specification corresponds to a maximum downstream bandwidth of 2000Mbps and maximum upstream bandwidth of 1000Mbps (by two passive optical network modem ports of 1000Mbps each and up to 1000Mbps each respectively). For 4x1000M Multi-Use Broadband Service Plans, bandwidth specification corresponds to a maximum downstream bandwidth of 4000Mbps and maximum upstream bandwidth of 2000Mbps (by four passive optical network modem ports of 1000Mbps each and up to 1000Mbps each respectively). For 2500M + 1000M Multi-Use Broadband Service Plan corresponds to a maximum specification downstream bandwidth and upstream bandwidth both 3500Mbps. Service requires equipment that supports the relevant broadband speed. For 10,000M Fiber-to-the-Home Plans, bandwidth specification corresponds to a maximum downstream bandwidth of 10,000Mbps and maximum upstream bandwidth of either 2500Mbps or 10000Mbps depends on the 10,000M Fibre-to-the-home plan subscribed. For 50,000M Fiber-to-the-Home Plans, bandwidth specification corresponds to a maximum downstream of 50000Mbps and

upstream bandwidth of 25000Mbps. The actual speed you experience using the Service will be less than the network specifications and affected by your device, technology, network and software used, network configuration and coverage, usage levels, international bandwidth and extraneous factors.

Legacy Services:

Service	Monthly Usage Fee	Include Usage
56K Dial-up Internet Services	\$298	Unlimited
1.5M – 18M Broadband Service	\$628	20 - 200 hrs

Dial-up services use Public Switch Telephone Network and analog modem to access the Internet.

Broadband services use broadband network (which can cater for various broadband technologies) and digital modem to access the Internet.

Remarks for Legacy Plans:

1. Service plans include the following:
 - (a) email address
 - (b) email storage
 - (c) Wi-Fi hotspots access (selected plans only)
 - (d) 56K dial-up access (selected plans only)
2. Specific service plans which don't include unlimited data usage provide at least 20 hours of broadband usage. Charge is based on the actual usage in hour with a \$2/hour above the entitlement.
3. Wi-Fi hotspots and 56K dial-up services are provided subject to charges based on the actual usage in minute:
 - (a) \$3/10 minutes, maximum up to \$98/month for Wi-Fi hotspots usage
